In [6]: backup=car.copy()

Quality

- names are pretty inconsistent
- names have company names attached to it

- some names are spam like 'Maruti Ertiga showroom condition with' and 'Well mentained Tata Sumo'
- company: many of the names are not of any company like 'Used', 'URJENT', and so on.
- year has many non-year values
- · year is in object. Change to integer
- · Price has Ask for Price
- · Price has commas in its prices and is in object
- · kms driven has object values with kms at last.
- It has nan values and two rows have 'Petrol' in them
- fuel_type has nan values

Cleaning Data

year has many non-year values

```
In [7]: car=car[car['year'].str.isnumeric()]
```

year is in object. Change to integer

```
In [8]: car['year']=car['year'].astype(int)
```

Price has Ask for Price

```
In [9]: car=car[car['Price']!='Ask For Price']
```

Price has commas in its prices and is in object

```
In [10]: car['Price']=car['Price'].str.replace(',','').astype(int)
```

kms_driven has object values with kms at last.

```
In [11]: car['kms_driven']=car['kms_driven'].str.split().str.get(0).str.replace(',','')
```

It has nan values and two rows have 'Petrol' in them

```
In [12]: car=car[car['kms_driven'].str.isnumeric()]
In [13]: car['kms_driven']=car['kms_driven'].astype(int)
```

fuel_type has nan values

```
In [14]: car=car[~car['fuel_type'].isna()]
In [15]: car.shape
Out[15]: (816, 6)
```

name and company had spammed data...but with the previous cleaning, those rows got removed.

Company does not need any cleaning now. Changing car names. Keeping only the first three words

```
In [16]: car['name']=car['name'].str.split().str.slice(start=0,stop=3).str.join(' ')
```

Resetting the index of the final cleaned data

```
In [17]: car=car.reset_index(drop=True)
```

Cleaned Data

```
In [18]: car
```
